

2020 Blueberry Selections

Bluejay – Highbush- Mid-Season (4-6 feet)

Like having a fresh blueberry stand in your garden! Enjoy long harvests of medium to large size, flavorful blueberries that hang well right on the bush. These vigorous plants also make a lovely addition to any yard, especially in fall, when the leaves turn yellow and orange. Perfect for northern gardeners. Resists cracking. Cold-hardy. Self-pollinating.. Nice fall color. Grows 4' - 6' high and 3' - 4' wide. Ripens Mid-July. Self-pollinating. Zone 4.

Rubel– Highbush – Mid season (4-6 feet)

A true "wild old fashioned" highbush blueberry that was selected nearly 100 years ago for its outstanding, full-flavored, sweet berries. Though the berries are small, they are simply the sweetest and most robust flavored blueberry that you will ever eat. Rubel also has the highest level of antioxidants of all blueberries and produces a consistent crop of scrumptious berries. Small, intense, flavorful sweet berries. Bery high in antioxidants. Grows 5 - 7 feet high & 4 - 6 feet wide. Nice fall color. Ripens late July. Self-pollinating. Zone 4.

ELIZABETH – Highbush Mid-Late Season (4-6 feet)

Giant Berries Bursting With Flavor! These enormous berries with a rich mellow-sweet flavor make Elizabeth a favorite of leading chefs. Elizabeth is said to be the best tasting mid-late season of all blueberries. Enjoy fresh berries longer—ripens over a very long season, from mid July to late in the summer. Large size berries. Nice fall color. Grows 4' -6' high and 3' - 4' wide. Ripens Mid-July. Self-pollinating. Zones 4-8

Sierra – Highbush – Early-mid-season (5-6 feet)

Sierra is a vigorous, fast growing blueberry. Light pink flowers proceed the excellent quality fruits. Sierra produces medium-large berries. They have good color, firmness and flavor. Ripens mid season. A tasty highbush blueberry with very little picking scar. Its shrub like habit is great for hedgerows. *Vaccinium corymbosum* 'Sierra' grows best in Full Sun. It will grow 5-6' tall with a slightly smaller spread. Nice fall color. Grows 4'-6' high and 4'-6' wide. Ripens mid-July. Self-pollinating. zones 5 to 7

SWEETHEART – Highbush - Mid season (4 -6 feet)

Very productive plants with medium to large, firm very flavorful berries. Plants are vigorous with heavy yields of sweet, juicy berries delivering enough plump fruit to satisfy even the most voracious berry lovers. The berries are particularly good in desserts or eaten fresh. A smaller late-summer crop is possible in milder zones. Nice fall color. Grows 4' - 6' high and 4'-6' wide. Ripens mid-July. Self pollinating. Zones 4-8.

BLUE CROP Highbush – Mid season (4-6 feet)

A great blueberry plant for colder climates. Produces big clusters of bright, large, all-purpose berries. Perfect in salads or pies, or served with cream. Cold-hardy. Ripens in July. Bluecrop is considered the best all around variety for adaptability, long production period, high yield fruit and disease resistance. Few varieties will perform better in the garden. Grows 4' -6' high and 4' - 6' wide. Ripens late July. Self-pollinating. Zones 4-7

Jersey – Highbush – late (4-6 ft)

Jersey Blueberry is an heirloom classic and one of the most widely grown blueberry varieties, Jersey blueberry is a favorite for home gardeners who want an easy to grow bush. Jersey produces late season crops year after year and tolerates a wide range of soil types. The sweet, medium sized, dark blue berry is of outstanding baking quality. Plants reach 4-6 feet when mature. Nice fall color. Grows 5'-6' high and 3'-4' wide. Ripens late July. Zones 5-10

Legacy – Highbush- mid-late season – (4-6 feet)

This cultivar is vigorous and consistently high yielding. The medium-large size superior berries are highly sweet with a pleasant acid balance. Resistant to diseases. Nice fall color. Grows 5' - 6' high and 4'-5' wide. Ripens late July. Self pollinating. Zones 5- 8

Cara's Choice – highbush – Late (4 -5 feet)

Uniform medium-large sized fruits are lighter blue and very firm. Berries stay firm and sweet on the bush for several weeks. Beautiful, blue-green foliage. Plant with another variety to increase yield and size of fruits Well-adapted for home gardens in the Northeast. Nice fall color. Grows 4 -5 feet high and 4 - 5 feet wide. Ripens late July. Self pollinating. Zones 5-7

NELSON – Highbush- Late season (5-6 feet)

A variety widely planted because of its dependable fruiting of a large, bright blueberry that is very firm with good flavor. The plant grows very upright and needs little pruning because of its open spreading plant habit. Nice fall color. Grows 4' -6' high and 4' - 6' wide. Ripens late July. Self-pollinating. zones 3-7.

Darrow – Highbush- Late (4-5 feet)

Large beautiful blueberries. Enjoy a bounty of delicious and sweetly robust fruit. This vigorous, attractive bush features pink-kissed flowers in spring and vibrant scarlet leaves in fall. Late season. Introduced in 1965. Ripens in August. Self-pollinating. Nice fall color. Grows 4' - 5' high and 4' wide. Ripens Mid-August. Self pollinating. Zones 5 - 7

ELLIOTT – Highbush - Late Season (5-6 feet)

Vigorous and productive plants, produce berries galore late in the season. This native American variety ripens in July, and the harvest of large, firm fruits with delicious sweet flavor goes on for weeks. Plant with at least two other blueberry varieties to ensure adequate cross-pollination. These blueberry bushes become a blaze of crimson in the fall, so they are ideal arranged as an informal hedge. These vigorous plants will produce fresh blueberries for pies and preserves for many years. Medium size berries. Grows 4' - 6' high and 3'-5' wide. Ripens late August. Self pollinating. Zones 4-7
